

The Air One Radio Station serves my children and I by providing a positive alternative to the type of music that is provided by most radio stations in our area.

Our community, especially the youth, need an alternative to the majority of music that is filling the airways.

Music has a powerful impact on the many people. Air One serves as a positive source of nourishment especially for our young minds. Having a station available for us to enjoy that doesn't encourage vulgar language and sexual promiscuity is of significant importance. I, among many others I know including my 11 year old son, was extremely encouraged when I found Air One on a local station in my area. Please consider allowing them to continue to broadcast through their local FM translators. Thank you for your time and consideration.
